An aperient and Stomarbic preparation of IRON purified of Oxygen and Carbon by combustion in Hydro, gen. Sanctioned by the highest Medical Authorities both in Europe and the United States, and prescribed in their prescribed.

in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions, indicate its necessity in almost every conceivable case.

Innoxious in all maladies in which it has been tried,

Innoxious in all maladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections E naciation, Dyspepsia, Concumption, Diarrhea, Dysentary, Incipient Consumption, Serofulcus Tuberculosis, Salt Itheum. Mismens.ruation, Whites, Chlorosis, Liver Complaints, Chronic hesdaches, Rheumstism, Intermittent Fevers, Pinples on the Face. &c.

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bed-ridded as to become forgotten in their own neighborhoods, have suddenly re appeared in the busy world as if just returned from protracted travel in a distant land.—Some very signal instances of this kind are attested of female Sufferers, emacinted victims of apparent marassmus, sanguineous exhaustion, critical changes, and that emplication of nervous and dyspeptic aversion to air and exercise for which trapication in a name.

In Nervous effections of all kinds, and for reasons face.

In Nervous affections of all kinds, and for reasons familiar to medical men, the operation of this prepara-tion of iron must necessarily be salutary, for. unlike the old oxides, it is vigorous y tonic, without being ex-citing and overheating; and gently, regularly aperient even in the most obstinate cases of costiveness without ever being a gastric purgative, or indicating a disagree

A moment's reflection ought to convince a sensible man of the felly and danger of constantly dosing with Cathartic Medicines. The practice is permicious and suicidal. An experience of forty years has taught me that the constantly increasing evils of indigestion are fearfully aggravated by the too free use of Cathartics. The American people are fast becoming a nation of dyspeptics by their artificial modes of life. Drastic Cathartics increase the irritability, and prostrate the strength of the digestive organs.
